

Digicon

Meadowbank School's Digital Technology Challenge

Digicon enables students from across the school try out new ideas and innovations. The first Digicon was in 2016. Digicon 2018 had students trailing a fantastic new classroom based breakout challenge called BreakoutEDU. The students need to work together to find clues and solve puzzles that provide combinations or keys that open locks and boxes to uncover a hidden treasure, all within 45 minutes.

MEADOWBANK MARVELS

Sustaining A Culture

In Room 3 we have been learning about sustaining our own culture and the cultures of others. We have looked at how stories, people, art, costumes and customs help sustain a culture. This week Seongjun brought in a traditional outfit called a Hanbok. He proudly shared this with the class. We also learnt about his favourite story, 'The red bean porridge granny'. We had fun trying to read the story in Korean! We then watched a Korean kindergarten act out the story in English. Seongjun helped us find South Korea on the Map and find Seoul. We then created South Korean flags out of pastel. Afterwards we learnt about Korean fan dancing and made our flags into fans! We were all so interested in finding out more about Seongjun's culture.

Discovery Time - Year 2

Year 2 have been exploring curriculum areas of interest to them. Through careful observation of the children's urges whilst at play the teachers have provided provocations to further extend their learning and understandings.

A wonderful example of play based learning in action.

Sand and Water - Maths and Physics

Construction - Technology

Mixing - Science

Musical Instruments - Music/Technology

Senior Tweeters

The Senior Tweeters visited the Meadowbank Retirement Village to perform for their residents. The children sang exceptionally well and the residents were very impressed with their talents.
